

Thank you for a fantastic 2020 spring season!

Thank you for all of your orders. As our plant material is bare root, we are closing sales until later this fall. We will be able to sell a few spruce and Saskatoon's for pick up only.

Our seedlings are growing in the field and in the greenhouse for the 2021 season. We harvest these seedlings October to mid-November, grade to size, count, and store them in temperature controlled storage. The website will be populated mid-December and ready for 2021. We look forward to serving your needs.
