

## **Thank you for a fantastic 2021 spring season!**

Thank you for all of your orders. As our plant material is bare root, we are closing sales until later this fall.

Our seedlings are growing in the field and in the greenhouse for the 2022 season. We harvest these seedlings late-October to mid-November, grade to size, count, and store them in temperature controlled storage. The website will be populated mid to late December and ready for 2022. We look forward to serving your needs!
